

Quality Policy

At IQE, we lead the semiconductor industry with advanced wafer products that drive innovation and power the connected, low-carbon world. We support our customers with a broad portfolio of leading-edge products.

To enable this

1. We Innovate – Pioneering new processes and technologies to stay ahead.
2. We Deliver Quality – Ensuring every product meets the highest standards.
3. We Improve – Using data and teamwork to continuously enhance what we do.
4. We Care – Striving to do right by our customers and our people.

Together, with clear leadership and a passion for excellence, we aim to be the best semiconductor materials solutions company in the world.

IQE is committed to achieving the highest standard in every aspect of its business through management focus, technology leadership, operational excellence, and continuous improvement.
